

# Data Validation State Web Release 4.1.0

## RELEASE NOTES

Release Date: July 2010

### SUMMARY

Data Validation (DV) State Web Software Release 4.1.0 has been installed on your system. This Release contains the following fixes and enhancements:

Fixes and Enhancements	
The Time lapse calculation in the range of 13 days was not accurate	Modified software with a new logic to calculate Time Lapse.
Benefits Population 10 and 11 Average Age and Median Age counts are not transmitted to NO	Made changes to data table and software to submit and display counts as a decimal value.
Transmit button disabled once it is clicked by the user until the submission has been processed.	Modified software to disable the transmit button temporarily after it is clicked by the user until the results are processed and transmitted.
Eliminate VY2009 from the Year drop down list for State Reports application.	Modified YEAR drop-down box to display years including next year with the current year starting from year 2010 because the software was displaying only partial data for VY2009. The database structure was changed during VY2009 and the software's queries could not retrieve data stored under the old structure
Benefits Population 10 and 11 Average Age score are not being displayed on State Reports application.	Made changes to software to display the scores for Report cell 9055L/c9 and 9055H/c8.
