Attachment I  
State Quarterly Performance Report  
ETA-9090, Table A - PY 2001**

Because of the variable lags in the availability of performance information, different performance measures will be cumulated for different numbers of quarters. Table A shows for each report item, the period over which it is to be cumulated and the number of quarters expected to be available for each report (by report quarter). The first column indicates the relevant performance indicator. The second column indicates the 12-month period over which it is to be cumulated. The remaining 4 columns show, for each quarterly report, the number of quarters to be cumulated for each performance period and, in parentheses, the time period covered by those quarters.

For example, the first item, Total Participants, is cumulated over the program year. Because this information is available immediately after the end of a quarter, the report for each quarter contains information cumulated through the end of the quarter. The second item, Total Exiters, is also cumulated over the program year; however, complete information on exiters in a quarter is not available until the end of the following quarter (to allow time to include soft-exiters). The seventh item, Entered Employment Rate, is based on exiters during the period from October to September, not on exiters in a program year. Because of the lags in obtaining the wage record data needed for this item, the value for a quarter's exiters may not be available until after the end of the third quarter after exit.

Because some states may be able to report more quarters than shown in the table for items based on wage records, the report form contains a column in which the number of quarters reported is to be indicated for each measure.

**Note:** Some states may be able to access complete wage records more quickly than assumed in this table. These states should report as many quarters as are available for the measures to be cumulated over the October 1 to September 30 period. Please remember, States may report more quarters than specified on this table, but NOT less.
